

Høytrykksvasker/Vogn 300 bar

JMB-S (on trailer)

JMB-S (incl. standard accessories)

Due to its on-board power source and self-contained operation, the JMB-S is easy to use in even in places where there is no electricity. It is ideally suited for a wide range of cleaning jobs, because it offers the choice of cold or hot water cleaning.

The efficient arrangement of the engine and control compartments and the possibility of working with the protective flaps closed make the JMB-S a high-pressure unit that avoids noise pollution and can therefore be used anywhere. The unit is mounted on a galvanised trailer that can be supplied with or without brakes. With a built-in high and low-pressure hose reel, the radius of use of this mobile cleaner is even greater. For safety reasons, the JMB-S unit is the first of its kind to be fitted with a 12V control system.

Its radial pump with 3 ceramic plungers, a brass/nickel-plated pump head and a boiler with separate motor mean that it is an enormous source of power, which is also very easy to maintain.

The JMB-S series is available in various versions (i.e. power ratings)

Supplied as standard with:

- single spray lance with high-pressure pistol
- built-in hose reel for 40 m high-pressure hose 3/8" (excl. HP-hose)
- built-in hose reel for 15 m low-pressure hose 3/4" (excl. LP-hose)
- pressure reduction to 10 bar when pistol is closed (SIR standard)
- stepless pressure and flow regulation via engine speed governor
- boiler with independent motor fitted with fuel valve with 3 s timing delay
- electrically-started diesel engine
- operating voltage 12 V
- pressure gauge
- hour counter
- water tank 115 l
- diesel tank 53 l
- unbraked trailer fitted with support and swivel wheel

T= unbraked trailer

TG= braked trailer

I= Built-in configuration, less wheels/axles/drawbar/enclosure/guarding

- Supplied with 2B CE certificate

(Subject to alternation)
